DETAILED ACTION

This action is in response to the communication filed on 3/14/08.

All objections and rejections not set forth below have been withdrawn.

Claims 9 – 13, 15 – 23, 25 – 32 are pending.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/14/08 has been entered.

Specification

The amendment filed 7/14/08 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

The tunnel key can be derived by hashing the concatenation of a Diffie- Hellman shared secret (e.g., session key [311]) together with client and server nonces. (Par. 53)

Challenge 319 can be an HMAC of the previous packet ID (e.g., pervious packet ID 314) using a shared secret (e.g., session key [311]). (Par. 55)

Applicant is required to cancel the new matter in the reply to this Office Action.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

The specification fails to provide proper antecedent basis for the recitations of *the tunnel key comprising a hash of a concatenation of the client public key together with the server nonce and the client nonce.*

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 9 – 13, 15 – 23, 25 – 32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the

Art Unit: 2137

time the application was filed, had possession of the claimed invention. Applicant has not pointed out where the new (or amended) claim is supported, nor does there appear to be a written description of the claim limitations in the application as filed (see above objection to the specification).

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 9 – 13, 15 – 23, 25 – 32, the subject matter of “*the tunnel key comprising a hash of a concatenation of the client public key together with the server nonce and the client nonce*” appears to distinguish the claims from the prior art.

Response to Arguments

Applicant's arguments with respect to claim 9 – 13, 15 – 23, 25 – 32 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: ***See Notice of References Cited.***

A shortened statutory period for reply is set to expire **3** months (not less than 90 days) from the mailing date of this communication.
